Professional Summary

Full-stack developer, founder of Keuri Digital Store, and Software Engineering student pursuing a BSc in Computing at the University of Sunderland. Founded and built a live digital products business in early 2026, and gained internship experience at Tamarind Community working on frontend components, databases, and integration in a team. Builds end to end with TypeScript, JavaScript, Python, SQL, Node.js, React, Next.js, Supabase, and PostgreSQL. Seeking a full-stack developer role building reliable, well-structured web applications.

Technical Skills

Languages	TypeScript, JavaScript, Python, Java, SQL, HTML, CSS
Backend & Database	Node.js, PostgreSQL, Supabase, Redis, REST APIs, database management, Graph Data Modeling (Neo4j)
Frontend	React, Next.js, Tailwind CSS
Tools	Claude Code, Git, Vercel
Other	UI/UX Design, Software Development Lifecycle (SDLC), Microsoft Office, Meta Business Suite

Experience

Founder — Keuri Digital Store 2026 – Present

- Founded and run a digital products store, launched in early 2026.
- Designed and built the e-commerce site end to end with Next.js, TypeScript, and Supabase.
- Delivered a bilingual (Burmese / English) storefront with local bank-transfer ordering.
